## **With the feeding and management software „SCHAUERCONNECT“ you always have all your data & facts at hand!**

Digitalization in animal production helps farm managers to make the right decisions! You always have all data and facts at hand! We are constantly developing our hardware and software - so you are always up to date!

„With the new SchauerConnect on your Topo feeding computer you can control all the equipment on the farm for your animal husbandry from one computer.

You can make changes to the feeding curves on the topo, change the parameters on the Schauer ventilation computer (series SLC-34XX), or make settings on the alarm unit 3G, conveniently on your topo. If your Topo feeding computer is connected to the Internet, you can control (view and operate) all devices remotely with one connection (Teamviewer)“.

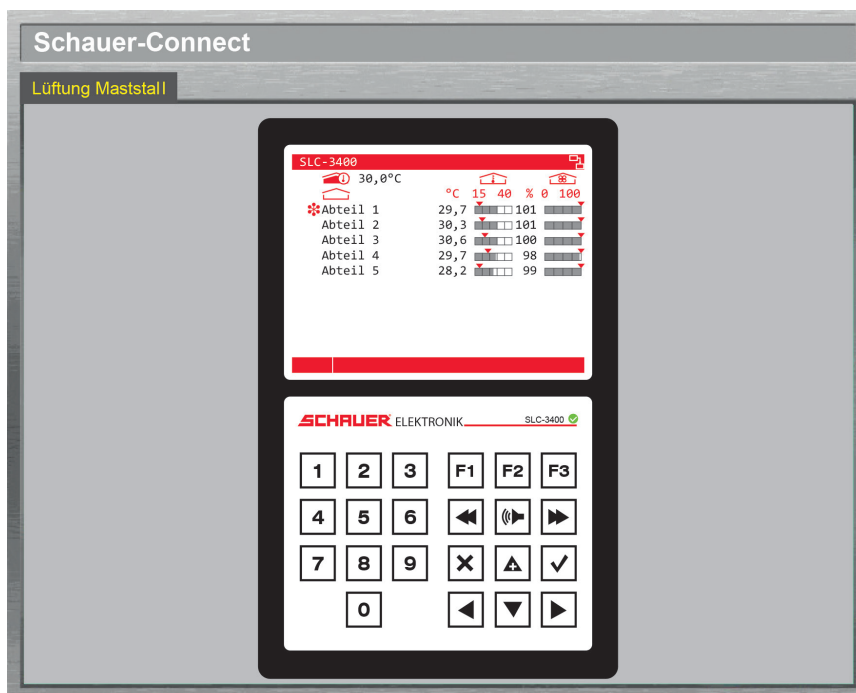

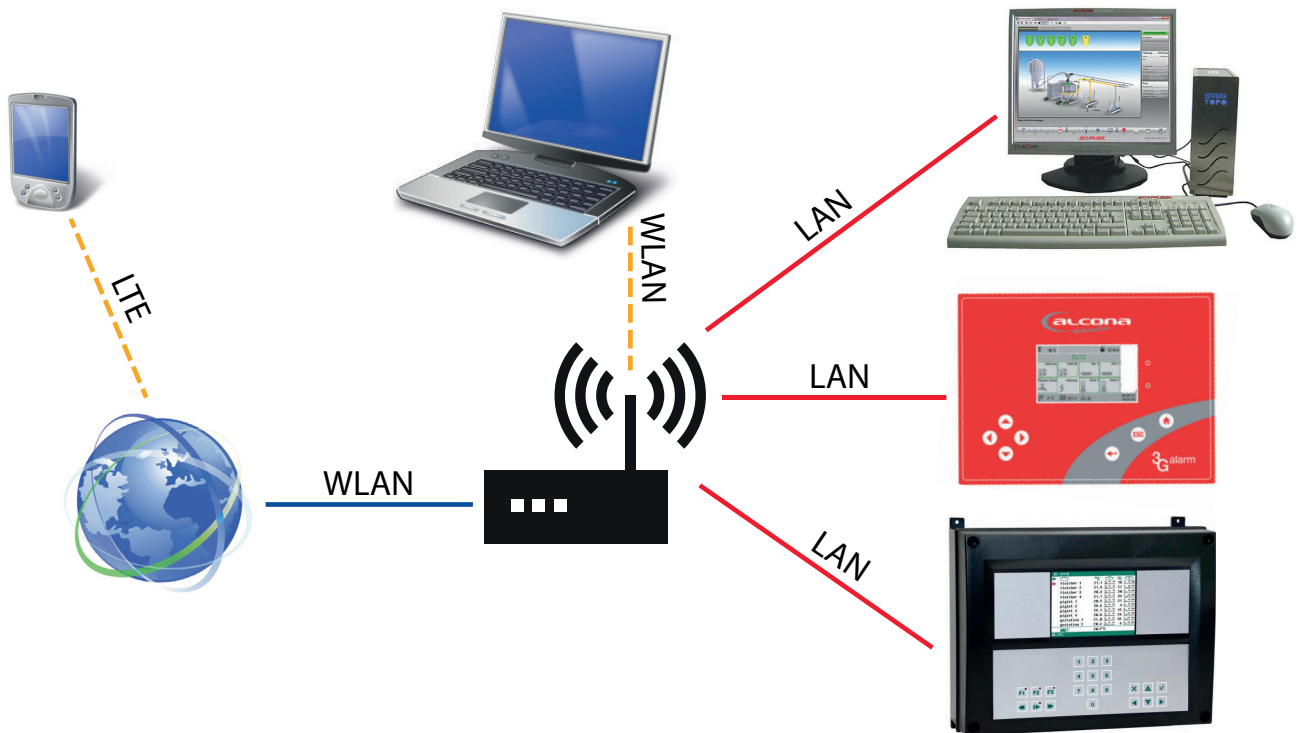

### **Quickly know what is going on and quickly do the right thing!**

The functional and convenient operation and particularly robust design of the Schauer feeding computers are appreciated by our customers worldwide.

- Requested feeding strategy
- Current data on the status of the plants
- Energy and consumption
